

Registration Fees

	Early	Regular
Industry	340 €	390 €
Academic	240 €	290 €
PhD Students	160 €	210 €
Students	130 €	180 €

Key Dates

Deadline for paper submission 15 June 2013
Notification of acceptance 14 July 2013
Final version due 31 July 2013
Poster abstract submission 10 August 2013
Early registration deadline 10 August 2013

Location

The main conference as well as the satellite workshops will take place at the North Campus of the University of Göttingen.

The Welcome Reception takes place at the Old Town Hall (Altes Rathaus, Markt 9) of Göttingen.

Welcome to the GCB 2013

The German Conference on Bioinformatics (GCB) is an annual, international conference devoted to all areas of bioinformatics. Recent meetings attracted a multinational audience with 250 - 300 participants each year.

The GCB 2013 is organized by the bioinformatics groups of Göttingen in cooperation with the German Society for Chemical Engineering and Biotechnology (DECHEMA), the Society for Biochemistry and Molecular Biology (GBM) and the Special Interest Group on Informatics in Biology of the German Society of Computer Science (GI).

The meeting is open to all fields of bioinformatics. Four satellite workshops are planned that will take place on 10 September 2013 and are part of the conference program.

Keynote Speakers

- Manfred Eigen, Göttingen
- Eugene Myers, Desden
- Erwin Neher, Göttingen
- Terry Speed, Melbourne, Australia
- Sarah Teichmann, Cambridge, UK

Call for Papers

GCB 2013 invites the submission of papers on all aspects of bioinformatics.

Regular papers

should have 8 - 10 pages and will be published in the conference proceedings (Open Access Series in Informatics of Schloss Dagstuhl). Paper submissions will be peer-reviewed by the program committee and judged by quality, originality and relevance. Submissions may cover any area of bioinformatics.

Highlight papers

(short papers) should report on recent work, preferably published during the last year. Topics include biological findings, new computational methods or new software tools. Highlight papers should be submitted as an abstract of at most 4 pages (including references). Submissions will be judged by the importance and novelty of the findings and relevance to the conference audience. Highlight abstracts will be made available via the conference website.

Posters

should present recent scientific work in any area of bioinformatics. Poster abstracts should not exceed 300 words including references. Abstracts of accepted posters will be made available via the conference website.

Submissions will only be accepted electronically on www.gcb2013.de/submission.

Satellite Workshops

- ▶ Statistical Methods in Bioinformatics (T. Beißbarth)
- ▶ Computational Methods for Metagenomics and Meta-Omics (P. Meinicke, T. Lingner)
- ▶ Alignment-Free Sequence Comparison (B. Morgenstern, S. Vinga)
- ▶ Methods for Integrated Analysis of Multi-Level Datasets (E. Wingender)

Social Program

A welcome reception in the evening of 10 September at the historical Old Town Hall will open the main conference. The participants are invited to enjoy finger food and drinks.

The conference dinner on 11 September gives ample opportunity for discussions in a friendly atmosphere.

The following evening, attendees have the occasion to join guided walks through Göttingen's center.

See gcb2013.de for details and regular updates.
